

Indoor Distribution Center

INTEGRATED ELECTRICAL DISTRIBUTION

Cycle Time Reduction

- Faster access to power
- Less field labor
- Eliminate site delays due to weather & manpower
- Concurrent construction process

Reduced Square Footage

- Compact design helps meet ever shrinking space requirements
- Stacked designs available

Quality

- UL classified
- Consistent high quality

Factory Commissioning

- Higher level of system integrity

Contractor Friendly

- Clear labeling
- Ample working clearances

Scalable

- Can be configured for any solution, large or small

Improved Sustainability

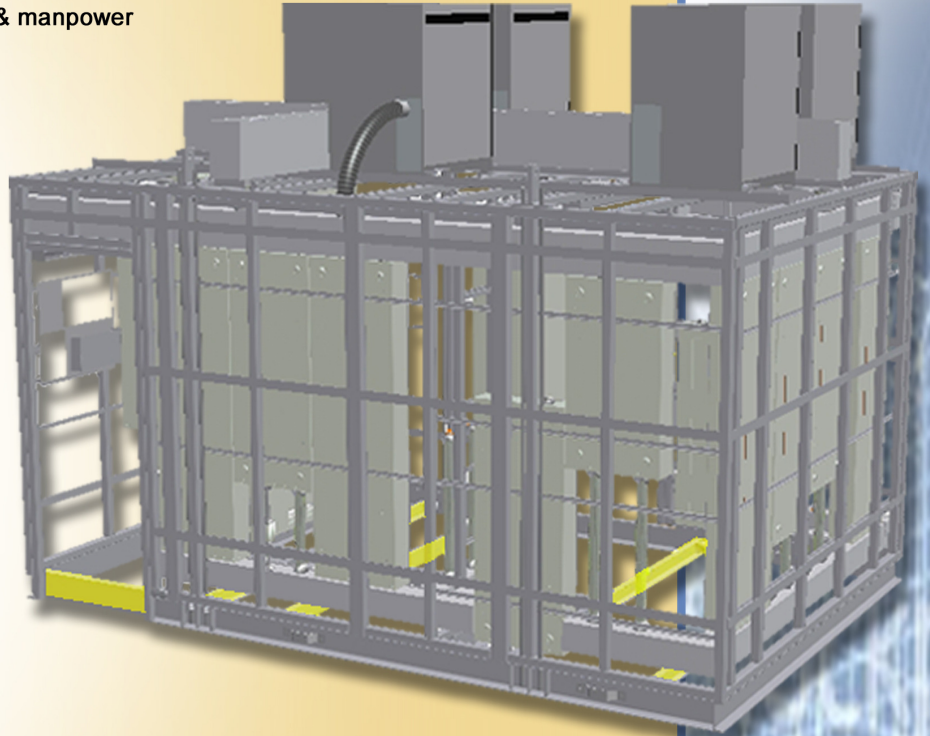

- Eliminate site waste
- Recycled materials

Integrated Project Delivery

- 3D design BIM modeling

Custom Architectural Integration

- Site specific size and shape
- Open/drywall/firewall options

The Integrated Power Solution That Saves You Space, Time, & Energy

All electrical & control equipment is pre-wired to the fullest extent, including any or all of the devices:

- Utility Compartments
- Metering Equipment
- Switchboards
- Power Panels
- Lighting & Appliance Panels
- Transformers
- Safety Switches/Enclosed Circuit Breakers
- Phase Loss Monitors
- Energy Management Products
- Transient Voltage Surge Suppressors
- System Backboards
- Power Conditioners
- Uninterrupted Power Supplies (UPS)
- Automatic Transfer Switches
- Motor Control Centers
- VFDs
- Integrated Wheels (option)
