

# Outdoor Distribution Module

Integrated Electrical Distribution

## **Construction Cycle Time Reduction**

- Faster access to permanent power
- Less field labor
- Eliminate site delays due to weather & manpower
- Concurrent construction process

## **Reduce Square Footage**

- Eliminate sq. footage required for power systems
- Roof mounted or slab/pier mounting available

## **Quality**

- UL classified
- Consistent high quality

## **Factory Commissioning**

- Higher level of system integrity

## **Contractor Friendly**

- Clear labeling
- Ample working clearances

## **Scalable**

- Can be configured for any solution, large or small
- Multi-section designs available

## **Improved Sustainability**

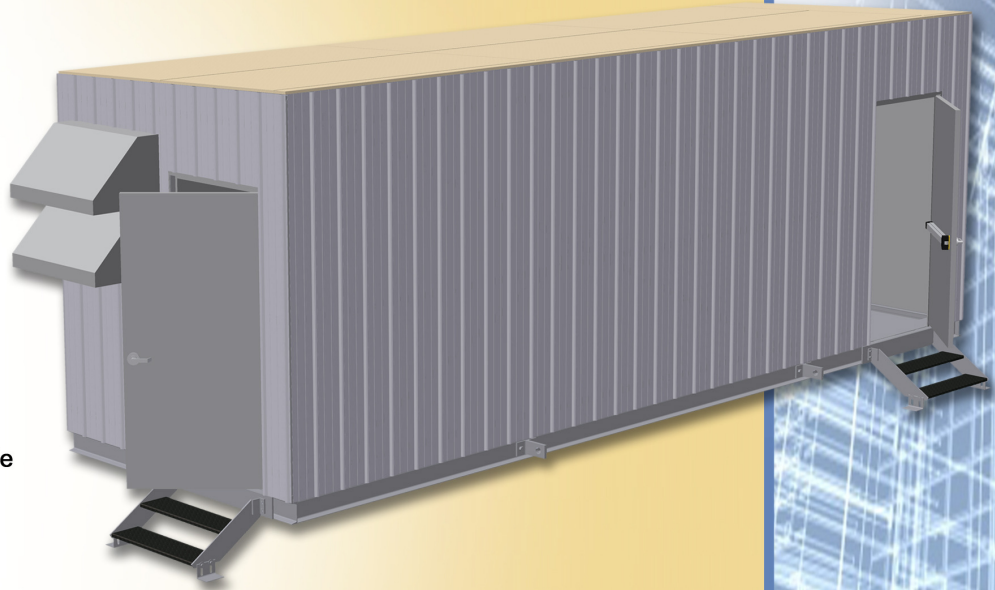

- Eliminate site waste
- Eliminate multi-deliveries
- Recycled materials

## **Integrated Project Delivery**

- 3D models available

## **Roof curb options available**

## **Multi-Exterior finishes available**

## **Turnkey Solution That Saves You Time**

**All electrical & control equipment is pre-wired to the fullest extent, including any or all of the devices:**

- Utility compartments
- Metering equipment
- Switchboards
- Power panels
- Lighting & appliance panels
- Transformers
- Safety switches/enclosed circuit breakers
- Phase loss monitors
- Energy management products
- Transient voltage surge suppressors
- System backboards
- Power conditioners
- Uninterrupted power supplies (UPS)
- Automatic transfer switches
- Motor control centers
- VFDs
- Receptacles
