

Reduce Linear Wall Space

- Compact design helps meet ever shrinking space requirements

Construction Cycle Time Reduction

- Faster access to power
- Reduce field labor

Quality

- Rigid modular steel frame construction
-  &  listed

Factory Commissioning

- Complete system validation

Contractor Friendly

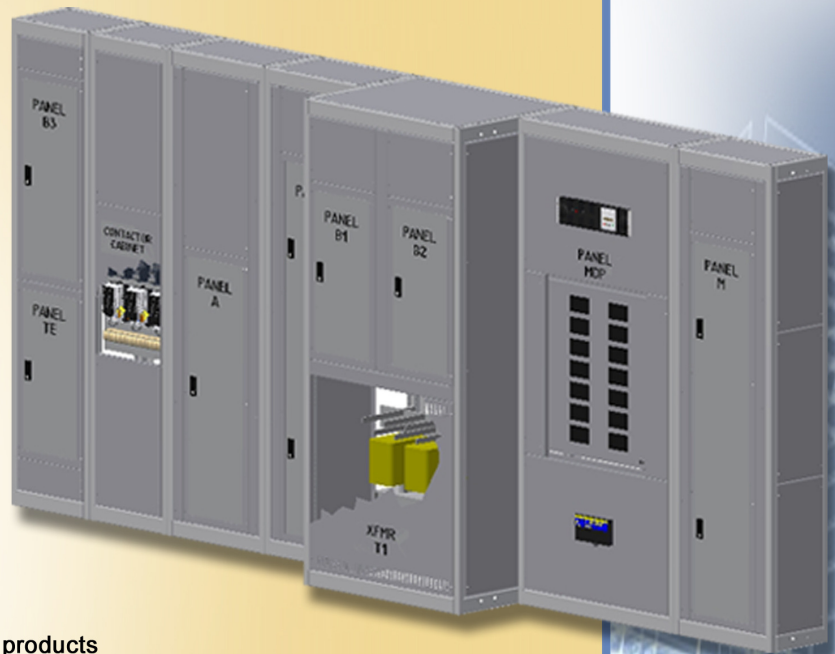

- Clear labeling
- Ample working clearances
- Wide open conduit locations

Flexible

- Universally accepts all major manufacturers' products
- Adaptable to site specific designs

Sustainability

- Reduce site waste
- Recycled materials
- Material handling efficiencies

The Integrated Power Solution That Saves You Space, Time, & Energy

Features

- Utility / Service Entrance
- Power Distribution Panels
- Lighting Panels
- Equipment Stacking
- Energy & Building Management Systems
- Transient Voltage Surge Suppression
- Up to a 500 KVA Transformer
- Automatic Transfer Switches
- UL 924 Emergency Lighting Systems
- Data Rack installations
- Low Voltage Fire, Security, Voice Paging Systems
- Corner Sections available
- Back-to-Back available

Technical Specifications

- UL 891 Dead Front Switchboard
- Enclosure dimensions 90" high, width & depth variable
- Seismic Rated
- Polyester Powder Coat ANSI 61 Grey
